

ALPHA LIGHTING

Industrial and Commercial Lighting Specialists

Daylight Bulbs

Alpha specialises in the supply and installation of high quality, low energy, full spectrum bulbs, often called daylight bulbs because they give the effect of daylight indoors. These bulbs are increasingly popular in an ever-widening range of locations, including schools, hospitals and workplaces because of the perceived health and wellbeing benefits.

Full spectrum bulbs and tubes enable you to see a complete range of colours without distortion, glare or washed out shades. Scientific studies have shown that using full spectrum lighting in schools and the workplace

- **improves general well being**
- **lessens eye strain**
- **improves concentration**
- **improves academic performance**
- **improves productivity.**

The truly surprising thing about daylight bulbs is that, contrary to popular belief, they are not a more expensive option – full spectrum fluorescent bulbs and tubes or LED lighting will consume at least 80% less energy and last about ten times longer than a standard incandescent light bulb.

Full spectrum bulbs are available in screw and bayonet fittings.
